Nasogastric/Enteral securement device with an open and close tab and cushioned foam barrier.

Measurements: 4.5" x 1.125" Base, 1.875" x .375" Holder

HCPCS: A4333 / A5200

The NG•SECURE®, from the M.C. Johnson Company, provides a comfortable and affordable solution for securing nasogastric tubing. With a moisture-resistant foam cushion, the NG•SECURE® creates a barrier between the skin and tubing, keeping pressure off the patient's nostrils and lips, helping prevent sores and discomfort. The resealable tab can be readjusted and repositioned as necessary making the NG•SECURE® the easiest choice for nasogastric securement.

Key Features and Benefits

NG•SECURE®

- **Easy application**
- **Foam cushion;** moisture-resistant foam cushion keeps pressure off the patient's nostril and lips, helping prevent sores and discomfort.
- **Quick open tab;** tab can be readjusted and repositioned as necessary.
- **Positioning and adhesive;** adhesive base adheres to patient's cheeks instead of the nose which can get oily.
- **Made in America**
- **DEHP FREE, HYPOALLERGENIC, NOT MADE WITH NATURAL RUBBER LATEX**

Uses

Nasogastric Intubation
