CATH•SECURE® LOCK

Features and Benefits

- Low profile
- No plastic parts, resulting in lower cost to end user
- Long securing tab with adhesive back
- Able to accommodate most sizes of tubing
- Adhesive tab to prevent movement of tube
- Velcro base to prevent kinking of tube
- Made in America
- DEHP Free, Hypoallergenic, Not Made With Natural Rubber Latex

Description

The CATH•SECURE® LOCK, from the M.C. Johnson Company, features an extended adhesive tab and locking velcro base, designed to fit and secure most sizes of tubing. The adhesive tab can be pinched around the tube to prevent rolling or pistoning while the velcro base keeps the tab locked to the patient's body, preventing the tube from getting caught on clothing or kinking. The CATH•SECURE® LOCK may remain in place for approximately one week without altering skin integrity and provides superior securement without the need for plastic parts, resulting in lower costs to the end user.

Applications

- Indwelling Urinary Catheters
- Central Line Ports
- Gastrostomy
- Jejunostomy
- Peritoneal Dialysis Tubing
- Hemovac Wound Drainage
- Jackson-Pratt Wound Drainage
- EKG Lead Wires
- Prostatectomy Tubes
- Leg Bag Tubing
- Condom Catheters
- PICC Lines
