NG•SECURE®

Features and Benefits

- Easy application
- Moisture-resistant foam cushion keeps pressure off the patient's nostril and lips, helping prevent sores and discomfort
- Tab can be readjusted and repositioned as necessary
- Adhesive base adheres to patient's cheeks instead of the nose which can get oily

Description

The NG•SECURE®, from the M.C. Johnson Company, provides a comfortable and affordable solution for securing nasogastric tubing. With a moisture-resistant foam cushion, the NG•SECURE® creates a barrier between the skin and tubing, keeping pressure off the patient's nostrils and lips, helping prevent sores and discomfort. The resealable tab can be readjusted and repositioned as necessary making the NG•SECURE® the easiest choice for nasogastric securement.

Applications

- Nasogastric
- Nasal Feeding Tube
