

# HYDROCOLLOID DRESSING

## Features and Benefits

- Provides a moist environment for optimal wound healing
- Barrier to bacteria and other contaminants
- Thinner, lighter structure with improved wear time
- Low-profile reduces possibility of edge-roll
- Semi-occlusive — oxygen and water vapor permeable
- No animal products means no odor
- Unique crosslinked formula provides extended wear times
- Alginate provides better fluid handling and ion exchange
- Ultra Thin version is nearly transparent

## Description

This integrated hydrocolloid formula (by Xennovate) with alginate, provides world-class wound healing effectiveness. We offer an ultra-thin hydrocolloid at 15 mm. Our standard hydrocolloid is capable of beating the competition's wear time while reducing profile and weight by 25%. The outer polyurethane layer provides a barrier against water and bacteria, while maintaining a moist environment. The semi-occlusive properties allow for oxygen and moisture vapor transmission creating the optimal conditions for wound healing.

## Compares To

- DuoDERM™ CGF - ConvaTec
- Comfeel® - Coloplast
- Restore® - Hollister
- RepliCare™ – Smith and Nephew
- Exuderm™ – Medline
- Ultec® - Kendall

Item No.	Description	Qty.	Measurements
WS7220-HT	Hydrocolloid Dressing	20/ctn	2" x 2" Thin
WS7410-HT	Hydrocolloid Dressing	10/ctn	4" x 4.25" Thin
WS7405-HR	Hydrocolloid Dressing	5/ctn	4" x 4.25"
