

TRANSPARENT FILM DRESSING

Features and Benefits

- Allows easy monitoring of wounds and IV sites
- Easy application
- Flexes and conforms for longer wear
- Fewer dressing changes reduce cost
- Moisture vapor permeable
- Waterproof dressing provides a bacterial and viral barrier
- Allows showering without removal

Description

Our multi-purpose, transparent film dressings provide a thin flexible covering to help protect the wound surface or secure catheters and IVs. The dressings are water-resistant to enable patient bathing and transparent to permit observation without removing the dressing. Their moisture vapor permeability allows excess moisture to vent while maintaining a moist wound environment conducive to healing. The latex-free adhesive is gentle on the skin.

Compares To

- Tegaderm™ – 3M
- Bioclusive® – J&J
- Opsite™ – Smith and Nephew
- DermaFilm™ - DermaRite
- SureSite® - Medline
